What's Happening Within ViskoTeepak:

Magdalena Czerwinska shares what it takes to be a Quality Specialist at **ViskoTeepak Poznan**

Learn more
about our team

A woman with a friendly expression is wearing a white lab coat over a black t-shirt. She has a white hairnet on her head and an orange lanyard with a red ID badge around her neck. The background shows industrial machinery, including a green frame and rollers, in a factory environment.

"I think team collaboration and communication are extremely important for the production process. Our success is founded on every employee's involvement and full awareness of their influence on quality."

Magdalena Czerwinska
Quality Specialist ViskoTeepak Poznań

Magdalena Czerwinska: An Insight into Quality work at ViskoTeepak Poznan.

Step into the bustling plant of ViskoTeepak in Poznań, and you might just come across Magdalena Czerwinska, our devoted Quality Specialist. Joining just one year after the Poznań plant was acquired in 2020, Magdalena is celebrating her second year with ViskoTeepak this October. Magdalena has already left an indelible mark in ensuring that every product we ship out matches the gold standards of quality that ViskoTeepak is renowned for.

A Day in Magdalena's Shoes

As a Quality Specialist, Magdalena is deeply engrossed in the intricate workings of the Food Safety System Certification 22000. But it's not just about paperwork and protocols for her. It's a mission to instill in every team member the weight of adherence, ensuring that our products and processes maintain unparalleled quality. Not only does she handle the meticulous details of annual audits, ensuring they progress without hitches, but she also lends her expertise to the international logistics in Poznań.

From Onions to casing

Before joining the ViskoTeepak family, Magdalena was already honing her skills in the food industry, specifically with processing vegetables like onions. ViskoTeepak, being her second employer, became a platform where she could further amplify her passion for quality.

Safety first outside of work

Outside the professional realm, she relishes the simple joys of life. Be it a leisurely walk, a thrilling roller-skating session (with safety gear, of course!), or a calming bicycle ride in the scenic Poznań Cytadela park, Magdalena ensures she cherishes every free moment, ideally with her dear friends and family.

Reflections on ViskoTeepak

Magdalena's journey with ViskoTeepak has been peppered with learning and growth. She fondly recalls the implementation of the Kosher and Halal systems as one of her stand-out challenges, which she embraced wholeheartedly, starting from scratch. She finds immense gratification in collaborating with colleagues, especially when counterparts from other ViskoTeepak departments visit. Such interactions, according to her, bring forth a plethora of new knowledge and skills that contribute to the unit's evolution. The acquisition has borne witness to remarkable growth, from a surge in productivity and international shipments to a strengthened trust in the consistent high quality of the casings produced. For Magdalena, the magic potion for a seamless production and logistic process is a blend of team collaboration and robust communication. She firmly believes in the power of individual contribution and is steadfast in her view that everyone plays a pivotal role in the product's quality.

In the horizon..

As she looks to the horizon, Magdalena's aspirations remain grounded in growth and challenges. Anchored in a company that constantly presents opportunities and a supportive environment, she eagerly awaits the myriad of challenges and learning that the coming years are bound to unfurl.
