What's Happening Within ViskoTeepak:

Mother's Day Celebration

When we achieve something, it is important to **CELEBRATE** and **BE HAPPY TOGETHER**.

ViskoTeepak Nuevo Laredo also hosts **Father's Day** celebration.

about our team

Nuevo Laredo - our Mexican ViskoTeepak family members.

Nova plastic casing was established in Godby, Finland, in 1995. The production of plastic casings was moved to Nuevo Laredo, Mexico, in 2004. It remains fully operational today.

“ From the very beginning, the goal of ViskoTeepak Nuevo Laredo has been to be as good as the world’s top producers of biaxially oriented plastic casing. To reach this goal, we have been granted the right to buy the best machines and equipment available to the business. Additionally, everyone at the company is committed to giving his or her input in the development process, the product, and the systems of quality control and assurance. ”

Rodolfo Torrez - Plant Manager, Nuevo Laredo

#WeAreViskoTeepak

Meet Dora Cerda

“I arrived at ViskoTeepak just when the plant started here in Nuevo Laredo. We were all new and learned about this new project together. My first 6 years at the company were spent in the extrusion area. I then supported the quality department for some years before moving to the printing area where I have been working for 5 years now. I love working here.”

Meet Maximino Perez

“I joined this great company 11 years ago. I like to learn from all areas, so that I can provide support to my colleagues in any way possible. I am currently in the printing area, and I will continue learning about the new processes as they become available.”

Meet Jesus Loya

“I have been with ViskoTeepak for 14 years now. My first 4 years with the company were spent in the extrusion area and now I am currently in the warehouse as a materials assistant. I hope to continue in this great company for many more years.”
